Premium flexible packaging solutions

Peelable

Reclosable

Compartment bag

Label bag

Metallised

Rip-n-grip

Bag-in-bag

Suspension

Materials

- Barrier films
- Bio films
- Paper structures
- Breathable films
- UV-light barrier films

Constructions

- Sterilizable bags
- Compartment bags
- Peelable bags
- Label bags
- Spout bags
- Bag-in-bag
- Hygiene bags
- Resealable bags
- Hermetically sealed bags
- Customised solutions

Technologies

- Clean room / white room
- Sterilization

Additional features

- Peelability
- Nic for easy opening
- Laser score
- Suspension

Combine with

- Weighing unit
- Counting unit
- Label application unit
- Direct printing unit
- Laser printing unit
- Linear feeding
- Pumps

White room packaging technology for medicinal cannabis

The product

- Dried cannabis flowers are available as cured and trimmed whole flowers or a precise blend of ground cannabis
- The dried flowers are delicate and require a packaging material that ensures protection against impact of light, oxygen and moisture

Pre-made bags

- Pre-made bags ensure safety, purity and precision in the packaging process
- As the bags remain closed from bag production until filling in a white room, there is no risk of contamination

White room packaging technology

- Easy cleaning
- Vision system to verify bag uniformity
- Plug & play tooling
- Quick change-over
- Fully compatible with any SCADA software for monitoring and supervising production

Filling

- Automated filling system
- Low drop height
- Accurate weight
- Single or double index bag filling
- Plug & play tooling
- Easy cleaning

Marking

- Customisable software for marking purposes
- A thermal transfer printer adds product details and traceability coding to the bag before filling

The Schur® Star solution

- Easy change-over to manual or semi-automatic filling
- Easy change-over to other bag constructions, other bag size or different bag material
- Multi-format capacity
- High filling capacity at a minimum of material consumption
- Low weight, low volume packaging material

Simplicity without compromise

The Schur® Star Concept

Innovative bag design

- Technical design
- Artwork
- In-house pre-press

High quality bag printing

- Premium printing technologies
- Bag lamination
- High quality management

Flexible packaging machine

Professional bag making

- Multi functionalities
- Unique design features
- Innovative bag shapes

The Schur® Star Concept

- The Schur® Star Concept consists of the Schur® Star Packaging machine and pre-made Schur® Star bags supplied to our customers linked together on a unique string
- It is all about adding flexibility to and removing complexity from our customers' production facilities
- The Schur® Star bags can be made to meet all possible functionalities needed, including all types of barrier capacities
- Schur® Star machines are easy to integrate into existing operations or can be a full stand-alone solution

Why Schur® Star

- The most flexible solution available
- Run multiple bag formats without additional tooling costs
- Quick change-over times to run multiple products on just one line
- No set-up times
- Differentiation by superior graphic design and bag quality
- Customisation – Easy to integrate into your existing processes
- For manual, semi- and fully automatic filling
- Wide range of innovative shapes and functionalities
